### WORK EXPERIENCE

#### Freelance Python & Automation Developer | 2024 - PRESENT

- Develop custom scripts, scraping tools, and automated workflows for clients.
- Debug and optimize Python applications for performance and maintainability.
- Use Git for version control and GitHub for collaboration.

### ACADEMIC HISTORY

#### Ajayi Crowther University | 2021 - 2024

Bachelor of Science in Computer Science

- GPA: 3.79
- Final Project: Security Model for MANET (Python + Network Simulation)

#### ALX NANODEGREE | In Progress

Python / Data Science Program

- 16-month specialization covering ML, Python, data analysis, AWS.

### PROJECTS

#### Amazon Product & Review Scraper

- Built automated scraping engine using Selenium with dynamic selectors.
- Implemented class-based architecture (Scraper class) to modularize navigation, extraction, and logging workflows.

#### Diamond Price Analyzer

- Built backend logic for real-time inference using pre-trained regression model.
- Created UI that allows users to input attributes and get instant price predictions.

### CERTIFICATION

#### Languages:

Python, JavaScript, SQL

#### Databases

MySQL

#### Version Control

Git & GitHub

#### Python Tools

Selenium, Tkinter, Pandas, NumPy, Scikit-Learn

#### Web Tools

HTML, CSS, Flask

#### Other

VS Code, XAMPP, OMNeT++
